Saïd Business School
Oxford, UK

The pattern of Spice Route from Christy Carpets helps to hide soil and gives a luxurious feel in the lounge area.

- Antron® Legacy™ carpet fibre featured in Christy Carpets' Spice Route broadloom carpet, has been fitted in the main dining room and bar lounge area of the Executive Education Centre of Saïd Business School, part of the University of Oxford. Approximately 400 m² of the broad linear stripe carpet was installed in these areas, as well as an adjacent coffee break out zone, in a contrasting colourway that provided a good palette from which to select upholstery fabrics. The bold stripe pattern and mix of loop and cut pile textures also helps to disguise any potential stains.

CASE STUDY:

Saïd Business School
Oxford, UK

With Antron® Legacy™ carpet fibre, Spice Route is ideal for use when ease of cleaning is essential. Carpets made of Antron® Legacy™ fibre have hollow filament fibre shapes that help to scatter the light so dirt is less visible. The combined effect of optimum light scattering and a small, smooth surface area make cleaning and

care more efficient. “The 130 seat restaurant and bar area of the Executive Education Centre is a light-filled modern space, divided centrally by a corridor. The stripe design of Spice Route was a useful device in helping to minimise the impact of the corridor and uniting the restaurant and bar lounge area” explains Jan Lund of Jan Lund Design, the company

responsible for the specification of the carpet.

“Spice Route met the need for a hardwearing carpet that was suitable for use in food service areas and it also fulfilled the brief

for a carpet that would give a luxurious feel in the lounge.”

The Saïd Business School is housed within a Grade 1 listed building designed in 1965 by Richard Burton. Located within 37 acres of parkland at Egrove Park in Oxford, the lounge area features a stainless steel clad bar that was an early commissioned work by famed furniture designer John Makepeace. Established in 1996, Oxford University's Saïd Business School is one of Europe's youngest and most entrepreneurial business schools, with a reputation for innovative business education.

→ *Antron® carpet fibres with hollow filaments minimize soil accumulation and make dirt harder to see. The hollow filaments refract and diffuse light and hide the dirt while the specially designed surfaces readily release the dirt, making cleaning easier.*
